Fan Noise 22dBA*

Mitsubishi proudly presents "Quiet Running Design of 22dBA*," slashing the fan noise level to 1/16th*² that of our conventional model. Concentrate on presentations free of fan noise concern.

(*1): When used at low lamp mode. (*2): The XL550U reduces fan noise to 22dBA (compared to 34dBA in the conventional model).

Long Life Lamp ~ Maximum 5,000 hours

Supported by our optimum design for light source lamp temperature control, maximum light source lamp use soars to 5,000 hours.*¹ This makes dramatic reductions in running cost, while likewise slashing replacement hassle for the light source lamp as a consumable part.*²

(*1): When used at the low lamp mode. Maximum lamp life at standard mode use is 2,000 hours. (*2): Lamp life refers to the average time required for brightness to be reduced by half, and not the time specified in the warranty. Use time may vary widely by the environment and conditions, and whether or not cleaning and other maintenance procedures are followed.

Lamp Side Replacement

The lamp may be removed from the side of the projector unit. This simplifies replacement without turning the projector around or over when suspended from the ceiling or resting on a shelf.

**Lamp Replacement Frequency***

(*): Lamp life refers to the average time required for brightness to be reduced by half, and not the time specified in the warranty.

Security Anchor

A robust key-lock chain may be passed through the projector hook. This reliable anti-theft measure helps prevent unauthorized removal of the projector unit from the premises.

Note: Mitsubishi Electric cannot accept responsibility for thefts occurring despite use of this safety feature.
